

BitTorrent Sync Alpha 4 Release Notes:

IMPORTANT NOTE: installation instructions for this Alpha are contained in the README file. Please ensure that you have read that document and followed those instructions closely. This version is **NOT** compatible with previous Alpha versions of Sync.

What's New?

- New onboarding flow
- My Devices functionality (see Welcome message)
- You can now sort the folders list by columns
- Visual polish and bug fixes
- Core engine improvements

What's Changed?

- The configuration files from this version are not compatible with previous versions -- you **CAN NOT** upgrade. You **MUST** perform a clean install -- please see the **README**.
- You **CAN NOT** use any prior version of BitTorrent Sync for any mobile platform with this version of BitTorrent Sync. Please only use the provided Android build 2.0.34.

Known Issues.

- For this Alpha only, Android mobile devices are supported with a build 2.0.34. All other mobile builds will not work with this desktop build. There is no iOS, Windows Phone or Kindle support for this Alpha.
- For this Alpha if there is a configuration file or any previous installation of BitTorrent Sync Alpha, you will need to remove that information. Please see the **README**.
- There is a slight delay in showing the My Devices connection on Android, please be patient, this may take a little time.
- Devices connected to the same network during the My Devices pairing process connect more quickly.
- Both devices must be turned on with BitTorrent Sync running in order to connect them using My Devices.
